

# Job Chronicle: J-120094

**Location:** Kirby Lake, AB

**Date of Work:** January, 2013

**Project:** B-4841 - Transformer  
from factory to substation

This 90,000 lb unit was brought up from the factory in Mexico on a truck. It was transloaded from a Mexican carrier to the American carrier in HLI's transload yard located in Laredo, TX. Once it was loaded to the American truck, the transformer was shipped all the way from Laredo up to Kirby Lake, AB. After arrival, the transformer was removed from the trailer using a jack and slide system. HLI was also responsible for the trucking and delivery of all of the accessories for this particular transformer.
