## JOB CHRONICLE # 17

**Date of work:** 2007

**Project:** Receive (1) transformer from arriving ship and deliver to foundation at site

**Location:** Seattle, WA to Duffield, AB

**HLI Scope:** The size of the transformer precluded transportation directly to site by rail.

HLI provided all the labor, equipment and supervision to barge and rail to site using floating cranes in Seattle and Vancouver to lift the transformer from rail to barge in Seattle and then again back onto the rail car in Vancouver for onward transportation to site.
